

AMICORP COMMUNITY FOUNDATION DESA LES COMMUNITY CENTER

Would you like to make a positive difference in the world right now? Here's how your support can transform lives and empower future generations.

On the island of Bali, known worldwide as a paradise for its beaches and perfect climate, ancient temples, and modern resorts, there is also much poverty. This scarcity is a hidden reality and is sadly more evident in the drier, poorer northern regency of Bali called Buleleng. Here children often only finish 6th grade, as their families cannot afford to send them to school to complete their education. This significantly affects their chances to get ahead in life. It impacts their confidence and self-belief and leaves them and their extended family unable to escape living below the poverty line.

THE DESA LES COMMUNITY CENTER

The Desa Les Community Center (DLCC) is a non-profit center aiming to deliver high-quality vocational and life skills training for young people and future generations from low and no-income families.

Our mission is to create opportunities for young people primarily in northern/eastern Bali by providing culinary skills and hospitality management training. The curriculum will also focus on building students' knowledge of important environmental sustainability and local cultural heritage preservation.

Our vision rests in establishing an exemplary platform to provide impoverished youth opportunities to develop

skills that will enable them to raise themselves above the poverty line. They will subsequently build better livelihoods through increased awareness, self-esteem, social skills, environmental consciousness, and self-sufficiency. Ultimately helping them build better lives not only for themselves but also for their families.

THE PROJECT

We are creating an innovative, transformational, scalable, and sustainable community center. The DLCC will prepare young people (aged 15-24) from low or no-income families from the region to capitalize on employment opportunities anticipated from the influx of hotels expected once a planned new regional airport is opened. Employment in the much sought-after cruise industry is also expected. Cruise ship employers provide relatively high income to Southeast Asians, and a skilled workforce from the north of Bali would benefit from access to this.

The land was purchased in 2016 and is located on 4,900 square meters of verdant tropical land full of tropical fruit trees, only 300 meters from the beach. The architectural plans have been drawn up. The center's architectural style will flow with the land by using a gentle and undulating roof where every inch will be used to grow food, scarce herbs. This garden is planned to be used as a revenue generator in the future and a source of key ingredients during the teaching sessions.

MAKE A DIFFERENCE TODAY

We are very excited about finding additional partners who can share our dreams to create this state-of-the-art learning center in Bali. Even with the support, we have already received, more financial support is still required. Partnering with Amicorp and the Desa Les project takes the hard work out of finding your own philanthropic or CSR project, so why not consider making a donation or inspiring your own network to get involved? Please consider doing something with your wealth that is worthwhile and sustainable. Something that will positively improve the world and benefit those that truly need your help.

Donate any amount you want; every contribution helps, and no amount is too small.

To arrange a single donation via bank transfer, find the details here:

BACKGROUND

Amicorp Community Foundation (ACF) has been active in northern Bali for some years now, working with local leaders and the community. ACF has already successfully completed a sanitation project delivering and installing 725 toilets/bathhouses for the impoverished local community. This has markedly reduced diseases in the region and provided much-needed sanitation and privacy for families across the Desa Les area.

A new project which we recently started is the Desa Les Community Center (Amisewaka). This represents a dream to deepen our impact in this community, specifically offering the young people of Desa Les opportunities to achieve a better life by acquiring skills currently missing in the region, ultimately providing them with personal and professional skills that generate vital economic empowerment.

The Desa Les Community Center is at the crucial next stage of development, and we require serious funding to make it a working reality. With your support, we can help transform lives and empower future generations.

AMICORP COMMUNITY FOUNDATION EMBRACE, ENGAGE, EMPOWER

The Amicorp Community Foundation (ACF) was established in 2001 as a channel to focus social empowerment efforts, increase environmental consciousness, and preserve biodiversity. We wanted to drive social impact in a more structured manner and use our resources sustainably to create win-win solutions, to empower disadvantaged communities by providing them with the means to a livelihood. We also wanted to cultivate in our stakeholders and our employees the mindfulness to operate in environmentally responsible ways to preserve natural resources for future generations. Moreover, we wanted to inspire our clients, partners, and anyone else to attain these goals of economic empowerment and environmental consciousness.

Cultivating social awareness to act and operate responsibly
